Personal Statement

I am a passionate and dedicated software engineer and IT student with an unwavering enthusiasm for technology. My journey in this field is driven by a deep curiosity and a relentless pursuit of innovation. I'm constantly willing to learn and progress, therefore I thrive on the opportunities and difficulties that software development brings. I am dedicated to using my experience to apply my academic knowledge and practical abilities to provide significant and effective solutions. My aim is to support initiatives that advance technology and promote constructive change.

Highlighted Projects

Scrum Master: Developed an automated system to streamline the student pairing process for the technical mentor. Resulted in a simplified and efficient pairing process, proving ability in software development, algorithm design, and project management.
